🌐 <https://www.linkedin.com/in/ricardo-t->

Technical Support Engineer with nearly 19 years of experience delivering Tier II and Tier III support across enterprise banking, managed services, Network Operations Center (NOC), and web hosting environments. Skilled in troubleshooting Windows Server, Microsoft 365, Active Directory, Azure, Linux, networking, virtualization, and enterprise infrastructure while consistently meeting SLA and KPI targets.

Recognized for maintaining a 95% First Call Resolution rate, achieving a 4.9/5 Customer Satisfaction (CSAT) score, and reducing callback rates by 12% through effective troubleshooting, root cause analysis, and proactive customer communication. Adept at supporting customers through phone, email, chat, remote access, and enterprise ticketing platforms in fast-paced technical environments.

Education

Trinity University of Asia	Bachelor of Science
Hotel & Restaurant Management	Quezon City, Philippines • 2000 - 2004

Experience

Self-Employed	Taytay, Rizal Philippines
Computer Technician (Freelance)	June 2020 – Present
Provide onsite and remote IT support for residential users and small businesses, delivering end-to-end troubleshooting, repair, and preventive maintenance services.	

Key Achievements

- Completed **300+ desktop and laptop repair projects**, resolving hardware, software, Windows OS, driver, and networking issues with a consistently high first-time repair success rate.
- Successfully recovered customer data from failed hard drives, corrupted operating systems, and damaged storage devices while maintaining data integrity whenever technically possible.
- Installed and configured **50+ wired and wireless home and small-office networks**, including routers, switches, printers, NAS devices, and shared peripherals.
- Diagnosed and resolved Windows boot failures, BIOS/UEFI issues, malware infections, Microsoft Office problems, performance bottlenecks, and hardware failures.
- Reduced repeat service requests by educating customers on preventive maintenance, cybersecurity awareness, backup strategies, and system optimization.
- Built long-term relationships through responsive service, clear technical communication, and reliable post-service support.

Outsourced	Quezon City, Philippines
Web Hosting System Administrator	June 2019 - March 2020
Provided technical support for Linux web hosting customers while maintaining high service quality and customer satisfaction.	

Key Achievements

-

Resolved an average of **40–60 customer support tickets per day** involving DNS, SSL, email, FTP, PHP, MySQL, website availability, and hosting configuration issues.

- Provisioned and administered **hundreds of shared hosting accounts** using WHM, cPanel, CloudLinux, and WHMCS.
- Maintained SLA response and resolution targets by providing prompt technical support through ticketing systems and live customer interactions.
- Assisted customers with website migrations, hosting renewals, account upgrades, and service provisioning while minimizing downtime.
- Collaborated with internal teams to improve customer documentation, technical processes, and overall service quality.
- Earned positive customer feedback through timely issue resolution and proactive communication.

iSupport

Ortigas, Pasig City, Philippines

NOC Technician

May 2015 - May 2019

Provided 24×7 operational support for enterprise infrastructure, ensuring service availability and rapid incident response.

Key Achievements

- Monitored **hundreds of enterprise servers, network devices, and infrastructure components** using enterprise monitoring platforms.
- Responded to **50+ infrastructure alerts per shift**, performing initial diagnosis, incident classification, escalation, and service restoration activities.
- Helped maintain **99.9% service availability** through proactive monitoring, rapid incident response, and effective collaboration with infrastructure teams.
- Managed the complete incident lifecycle, including event monitoring, ticket creation, root cause analysis, escalation, reporting, and closure while adhering to ITIL best practices.
- Collaborated with Global Infrastructure teams during critical incidents, scheduled maintenance, and change implementations to minimize operational impact.
- Recommended process improvements that enhanced operational efficiency, reduced incident response times, and improved service reliability.

Atos

Quezon City, Philippines

Service Desk III

August 2007 - April 2015

Provided advanced Tier III technical support for enterprise banking environments supporting mission-critical applications and infrastructure.

Key Achievements

- Resolved **40–60 technical incidents daily** through phone, email, remote support, and enterprise ticketing systems while consistently meeting SLA targets.
- Supported **thousands of banking end users** across multiple branches by resolving Windows, POS, application, account access, networking, hardware, and connectivity issues.
- Maintained a **95% First Call Resolution (FCR)** rate by accurately diagnosing and resolving technical issues without unnecessary escalation.
- Achieved a **4.9/5 Customer Satisfaction (CSAT)** rating, consistently exceeding team averages by **14%** through exceptional customer service and technical expertise.
-

Reduced repeat callback rates by **12%** by identifying root causes, documenting solutions, and educating users on preventive practices.

- Served as the escalation point for complex incidents requiring coordination w infrastructure, networking, server, and field engineering teams.
- Authored technical documentation and knowledge base articles that improve knowledge sharing and increased first-contact resolution across the Service Desk.
- Recognized by leadership for effectively resolving high-priority production incidents while maintaining professionalism under pressure.

Projects

Home Lab & Systems Administration

May 2015 - May 2019

- Built and maintained Windows Server and Linux virtual machines for Active Directory, DNS, DHCP, Group Policy, PowerShell scripting, malware testing. Hyper-V, VMware, Windows Server 2022, Group Policy, Azure integration, Microsoft 365, PowerShell automation, ClamAV, YARA, VPN, Backup, Virtual Networking
- Simulated enterprise troubleshooting scenarios involving networking, virtualization, backup, and endpoint security.
